

# DIY **FALL LEAF** Garland

## Directions For Creating Your Beautiful Fall Garland

**COLLECT** colorful fallen leaves from your yard (or if you don't live near deciduous trees or the leaves have been blown away or are already blanketed by snow, pick up some artificial fall leaves from a craft store).

**THREAD** a needle with a long piece of thread (the width that you want your garland to be) in a fall color of your choice. Use the threaded needle to thread together the leaves, and secure the ends with knots.

**TACK** the garland onto a mantle, a table edge, along a banister, or even across a doorframe or window to add an instant pop of fall color.
